

duo

reimagined controllers for streaming media,
games & entertainment. Designed for
Samsung's VBL and modeled in Solidworks.

research

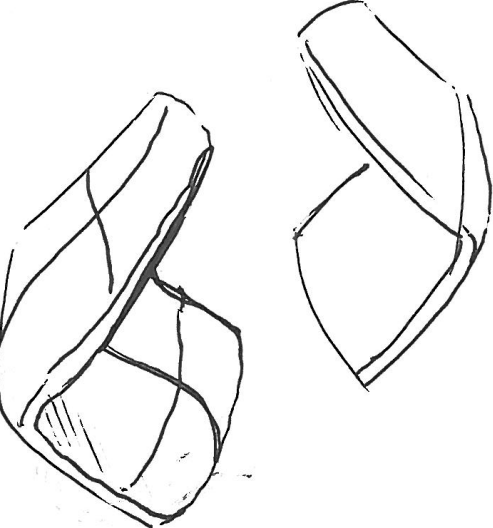

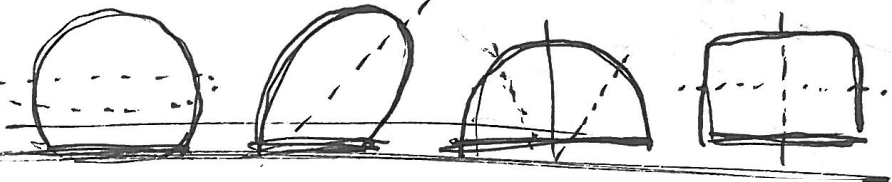

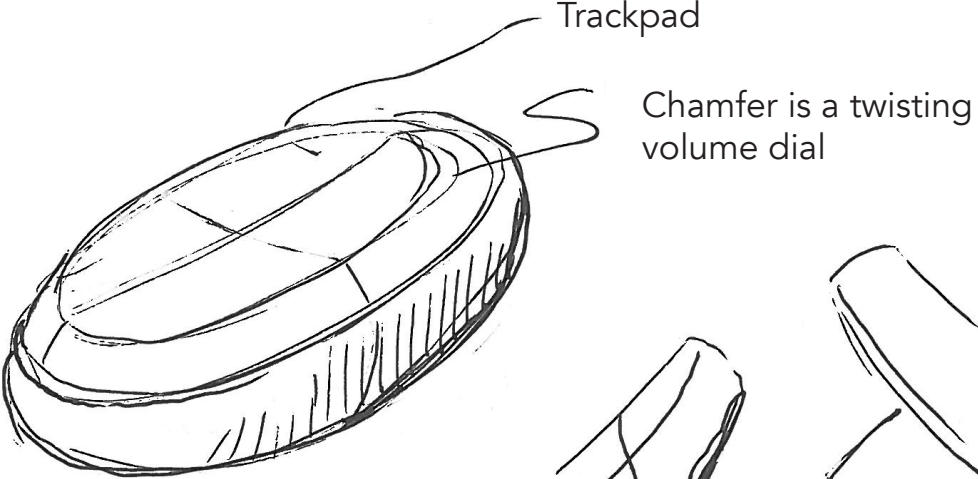

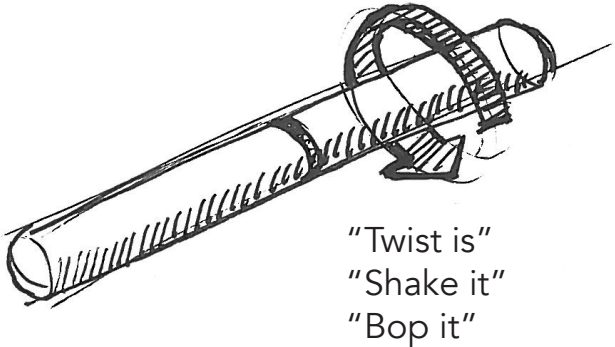

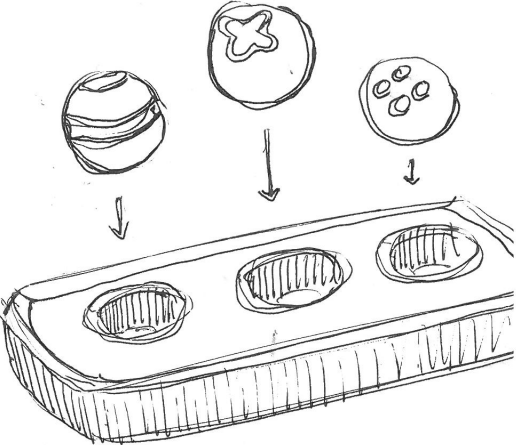

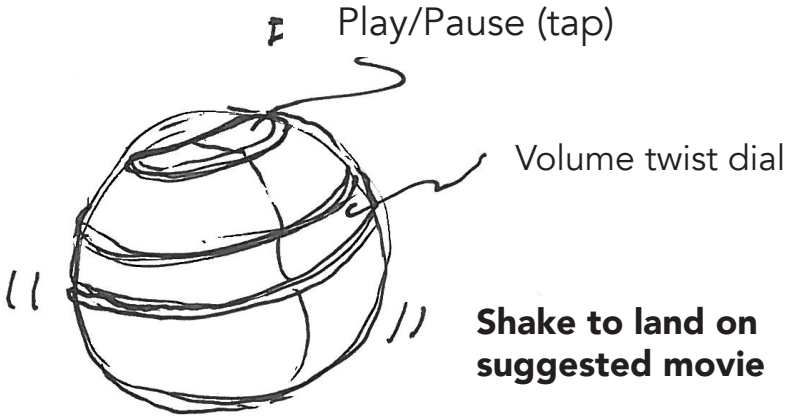

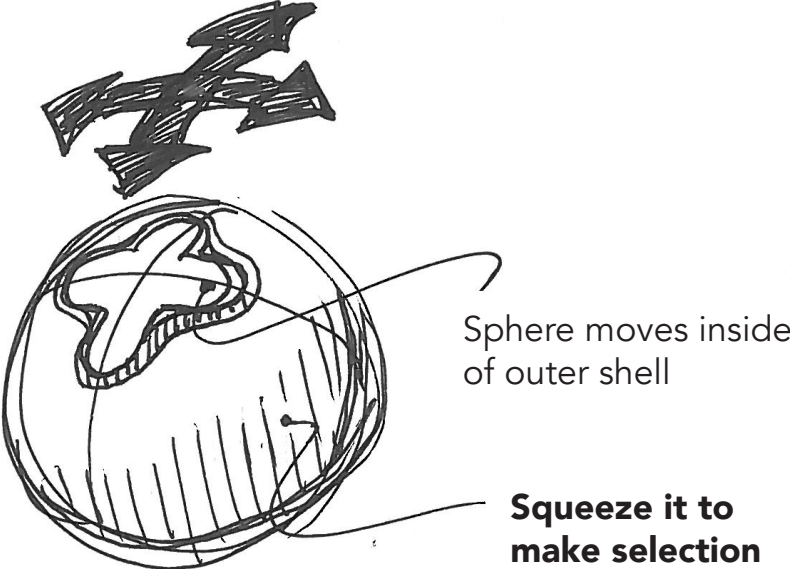

- **video streaming** services are growing
- launch of Stadia - **streamed gaming**
- **accessibility** creates casual gaming

Need for a controller that works with all streamed services and has **visual appeal within its environment**

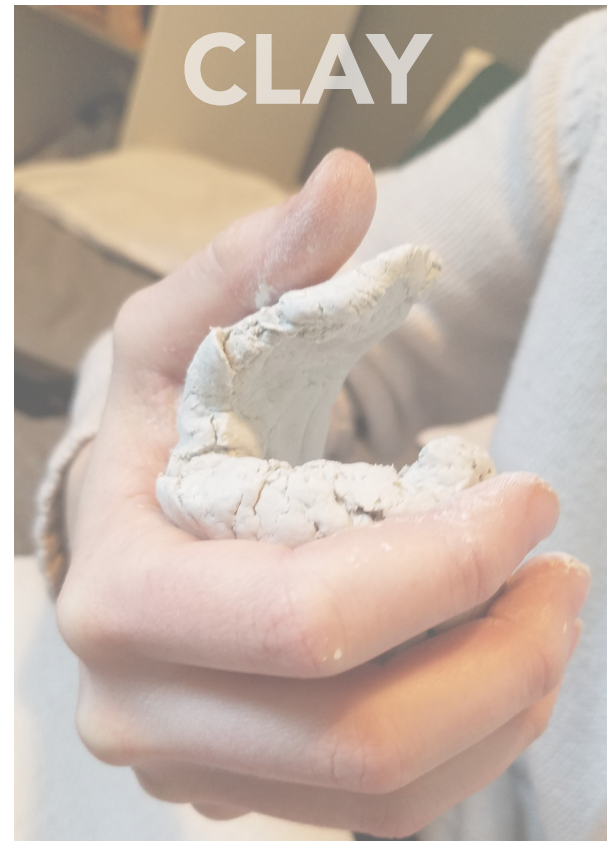

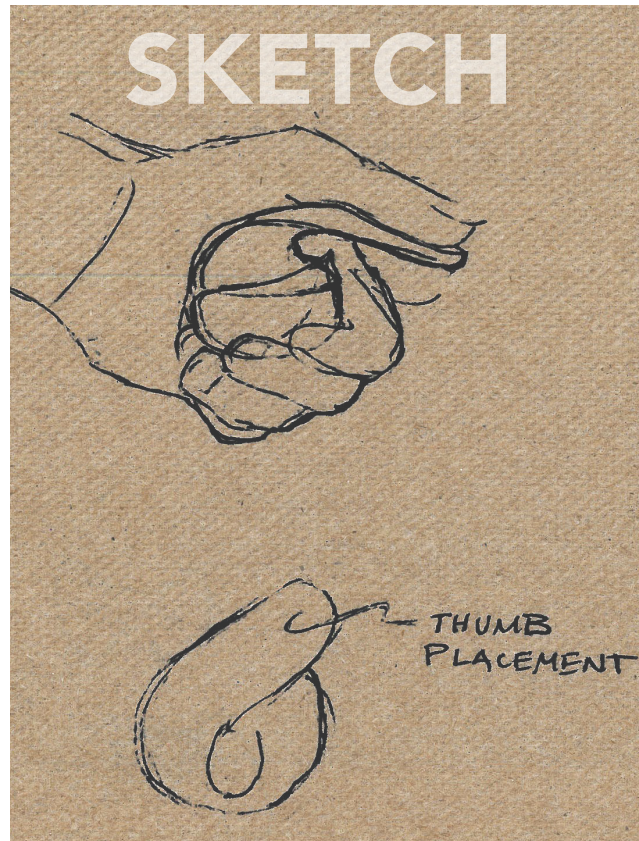

branding and form inspiration

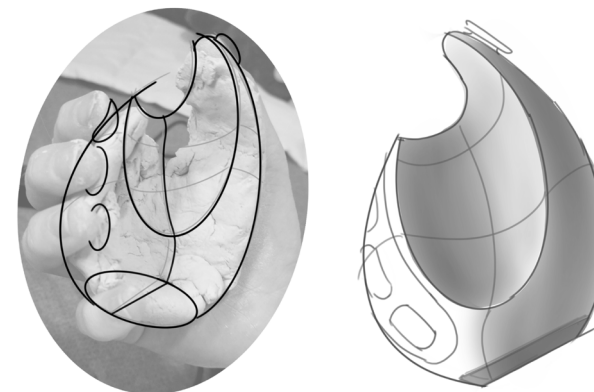

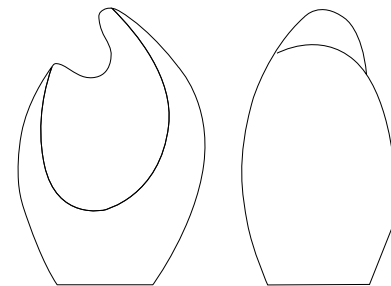

ideation

form development

Foam and clay were used to help improve the ergonomics of the form and create a sense of balance.

one trigger &
two secondary buttons
on each controller

low-profile sliding joysticks

matte rubber
over-mold

wireless charging dock

duo

final concept

duo can be used as a navigator for media or simple games with one controller.

Picking up both provides full capabilities of a typical game controller.
